

FOR IMMEDIATE RELEASE

Meritor Adds TRC To Its Expanded North America Authorized Rebuilder Program for Axle Carriers in the United States

(Cinnaminson, NJ, September 11, 2018) Meritor, Inc. (NYSE:MTOR) today announced the inclusion of TRC in its [North America Authorized Rebuilder Program](#) for drive axle carriers, including the company's 145, 14X™ and 160 products, to supply wholesale distributors and dealers with genuine remanufactured Meritor carriers.

"Exceptional rebuilders like TRC help fleets maximize uptime with 24-hour shipment of highly reliable, reman carriers that meet original performance specifications," said Brett Penzkofer, vice president, Aftermarket, North America for Meritor. "The program has been very successful in Canada and is generating considerable interest among fleets, dealer groups and OEMs."

Fast turnaround is essential in keeping fleets on the road. Quick service, reliability, and shipment within 24 hours of the order by Meritor ensures that customers' vehicles will be back up and running with parts rebuilt to the highest quality standards.

Meritor-trained commercial vehicle technicians at TRC will have the capability to update the carriers with Meritor's latest product innovations. Each of the rebuilders test all carriers to ensure they meet or exceed Meritor OEM rebuild specifications, with all rebuilt units containing a unique serial number that will be documented and tracked by Meritor for quality assurance.

Keeping up with product improvements and technology in the rapidly evolving transportation industry is crucial, according to Dave Olsen, CEO, TRC. "Today's drivetrain components continue to become more complex, so our association with Meritor is a critical step in ensuring we thrive in our remanufacturing efforts and serve our customer base," he said.

Access to Meritor-trained commercial vehicle technicians is a key feature of the Authorized Rebuilder Program, integrating Meritor's depth of knowledge and resources into the manufacturing process to supply customers with a high level of parts and service.

Equally important is establishing proper installation and procedures. Attention to detail is emphasized with technicians, and additional training from Meritor ensures that all carriers are rebuilt for premium performance and dependability. It offers customers another level of quality. To ensure reliability, carriers are rebuilt using 100 percent genuine Meritor components.

Meritor will back each genuine reman carrier rebuilt by an authorized rebuilder with two-year nationwide warranty coverage. For full details you can contact any of the TRC branches throughout the U.S. or by visiting their website, TRCreman.com.
